

Make Your Own Instrument of the Week!

Welcome to our new fun craft feature! Make your own instrument of the week to use in your online Tot Bop class!

This week's instrument ... **Tin Can Shaky Drum!**

Here's how you make it ...

1. Ask Mummy or Daddy for an old tin can. It could be a baked bean tin or a used tin of tomatoes. Give it a wash in warm water and peel the label off.
2. Using a clean spoon, scoop a spoonful of uncooked rice, pasta or dried beans/lentils into the can.

3. Use a balloon for the top of the drum. Cut off the bottom of the balloon to leave a bigger opening. Stretch the balloon over the open side of the tin can.

4. Stretch the balloon down the sides of the can until it forms a taught drum on the top and there are no wrinkles.

5. Add an elastic band to the top to secure the balloon in place and to add a little extra colour!

Your tin can shaky drum is complete!
